

QUALITY AND SUSTAINABILITY POLICY

GL EVENTS AUDIOVISUAL

OUR PURPOSE

For over 30 years, GL events Audiovisual has been providing its clients with professional expertise in all technical and technological trades of the event industry. GL events Audiovisual is part of the GL events Group.

From design to implementation, our professional teams guarantee comprehensive and personalised services for one-off or long-term installations, in both audiovisual and energy sectors: video, sound, lighting & structure, digital solutions, simultaneous interpretation, heating, air conditioning, electrical distribution and energy production.

Thanks to its broad range of equipment and expertise, GL events Audiovisual stands out as one of the leading players in its sector. Its mission is to create and implement innovative audiovisual and energy solutions, while adopting an ambitious approach to sustainable development.

OUR VALUES

In line with GL events Group's values and Ethical Charter, GL events Audiovisual plans its development in a sustainable and responsible manner. At the heart of this vision, the company's values go beyond economic profit:

ADAPTABILITY / CREATIVITY / COHESION / PERFORMANCE / CLIENT ORIENTATION

Building on these values, GL events Audiovisual is now seeking to translate its commitments into ISO 9001 (quality) and ISO 20121 (CSR) certification for its activities.

OUR ISSUES

We intend to transform our business to make them more sustainable, in order to limit our ecological footprint and that of the solutions we offer.

Also, we strongly believe that bringing people together creates a fundamental social value for our society. Beyond regulatory requirements, we are working towards including stewardship, inclusivity, integrity and transparency in our work methods.

OUR COMMITMENT

Our aim is to improve our organisation to better satisfy our customers and effectively meet the expectations of our stakeholders (clients, suppliers, employees). We are therefore committed to undertake sustainable actions in 6 areas:

- Optimising processes and making them sustainable by creating a good practice framework, shared and made available to every employee
- Limiting the environmental impact caused by the transportation of our equipment and our employees
- Making our purchase of equipment and service more responsible
- Promoting and encouraging the health, safety and well-being of our teams and those of our subcontractors
- Integrating more responsible and sustainable products and services in our offer
- Being a more inclusive company, cultivating diversity and favouring equal opportunity

This commitment takes the form of daily actions, carried out by the teams in our branches in France, in a spirit of continuous improvement.

Convinced that this ambition is an opportunity to strengthen our collective performance by giving meaning to our missions, we encourage all our employees to become actors in this transformation and mobilise them to build a sustainable future together for future generations.

Véronique LAMOINE
Executive Director
